DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 01/15/2009 has been entered.

Notice of Amendment

2. In response to the amendment filed on 01/15/2009, amended claim(s) 7, 11, 17, and 18 and new claim(s) 19-28 is/are acknowledged. The rejections of the claims is/are *withdrawn*. The following is/are set forth:

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael Krieger on 1/29/09.

The application has been amended as follows:

Claim 24 lines 17-18 are amended as should read follows:

“obtaining, from said probe, an electrical signal at the patient's skin corresponding to said first dermal area [meridian].”

Allowable Subject Matter

4. Claims 7-14 and 18-28 are allowed.
5. The following is an examiner's statement of reasons for allowance: the prior art does not disclose, teach, and/or fairly suggest a method, comprising *inter alia*: contacting a dermal area of a patient's skin with a probe and obtaining from the probe an electrical signal at the dermal area, wherein the probe statically contacts the skin via placement by a user and the probe dynamically varies an applied pressure to the dermal area, and wherein the probe is stabilized against the dermal area with a stationary element and a biasing element with a feedback loop that dynamically varies the applied pressure of a probe tip with a detector that detects the electrical signal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
